Kids Will Ask What We Did

... WE MUST develop a clean-energy economy and reduce our global warming pollution.

As a person of faith working with New Mexico Interfaith Power and Light throughout New Mexico, I believe we must show leadership in creation care and care of brothers and sisters. Our nonprofit has programs that help teach congregations to conserve energy and become more energy efficient. This reduces pollution and saves money on energy bills. ...

Future generations will ask, "Did you not hear the signs of the times? Why did you not act?"
